Apple Media Services: Podcast Preferences

April 2019

File name Podcast Preferences.csv

File description This file contains the user's settings for controlling how Siri behaves when asked to play news podcasts.

Why Apple keeps this information Apple retains this information to log individual user preference for how Siri behaves when the user asks Siri for news (e.g. "Hey Siri - what's the news?") and to improve the service.

Field Name	Details
Created	The date and time on which the preference was created
Last Modified	The date and time on which the preference last was updated
News Topic Id	String value for the user's requested type of news
Item Reference Number	The numeric identifier for the Podcast
Podcast Description	Human readable description of the Podcast
